

Notes – What is Scrollytelling?

Scrollytelling 2020

Hello! Thank you for your interest in this course, where you will learn skills that very few people have. The most important thing you can do in this course is to stick with and can complete the Course Project. The beauty of scrollytelling is that it is NOT hard to do! So the work that you put in can pay back really quickly.

It is very helpful if you have a basic understanding of HTML, CSS, and JavaScript before you start the course lectures. But you don't need to know very much. I would recommend doing the first five tutorials at W3 schools for each of these coding languages: HTML, CSS, and JavaScript at W3Schools. It's free, and you can come up to speed in just one day!

If you have a question, or are stumped on a problem, post your question on the course forum, here:
